Subject: RE: Latest Summary

This attached detail shows \$410 base cost but the formula for calculating that does not include the General projects at the top. The sum formula needs to be changed to include up to the ATM in row 4.

What's the line that says SR99 Elements and has \$10 million? I think that needs to be removed.

This number still doesn't match the amount shown in the summary, so what's the difference between the summary and the detail?

Is this being sent to the SAC today or did it get delayed?

I'm trying to finalize our cost graphic and we are very interested in having it show the same information as what we are sharing with the SAC and Tri-Agency. I really need to know what a final number is so I can complete it and have it ready to share. Any help you can give me to meet this goal would be appreciated.

Brad,

This has been changing almost hourly today. RP's are making changes in the scope of many of the building blocks.

Any constructive critique will be appreciated.

Thanks!

Best Regards,

Mike Morrison

Can you please send me a copy of your detail? I don't understand why the I-5 components are only \$349 base cost. The base cost spreadsheet that I sent yesterday had a total of \$540 base cost. Did something change that I don't know about?

Subject: Latest Summary

Ladies and Gentlemen,

**Please immediately forward a copy of this e-mail to anybody that I missed by mistake.
Thanks!**

Attached you will find a .pdf copy of the current summary information for the capital cost for Hybrid Scenarios L and M.

I will add the O & M costs tomorrow morning.

I will be here in the building meeting with Lindsay Yamane at 8:00 a.m. Please call me on my cell phone if you need to discuss any of the cost estimate material prior to 9:00 a.m.

Where is the 9:00 a.m. meeting?

There are a few details that occurred around 5:00 p.m that are now incorporated that not all of the people know about.

Best Regards,

Mike Morrison
