Subject: More documentation graphics
Attachments: Fig 5 - Preferred Alternative.pdf; Stage 2 Jurisdiction Plot (5-27-09).pdf

Attached are two other drawings that will be used for design documentation. One is a updated preferred alternative graphic that depicts the latest design (I accidently used a older drawing that I sent in the email last night). The other is a jurisdiction plot that was requested by Susan Everett. The jurisdiction plot is just a draft because there might need to be discussion about the actual limits of what will be designated as a WSDOT and City but I think I gave a rough outline.

Lee, I will start to prepare the proprietary item cost estimate. This might take a reasonable amount of time however considering that it is a hundred items and there are probably items that are not broken in the 90% project cost estimate.
