Sounds good John. We didn't get to this subject with Ron and Dave yesterday at all, so we still have a little time to fine-tune things.

Amy - presume you mean John W.

John W - when you get to this, give me a call - I have a more fundamental approach which I think corresponds with your thoughts.

We didn't get a chance to talk about it; other issues dominated the conversation.

I am going to have John look through the info once and then send it on to Dave and Ron for their review.

Harvey and Amy - apologies for not having time to contribute in more detail up until now. Let me know if you need current input.
How did your meeting with Dave go?

Amy, here is what I can get for you now. More in the morning if you need it. Also Gordon is checking the lane mile costs; some of my costs did not come out with the same answer.

Best regards,
Harvey

Here is what I have as of 5:22 p.m. Mike Morrison is still working on the risk issue and I need to do some more work on the summary pieces, but it appears to be heading in the right direction. Comments by 9 a.m. would be much appreciated so we can run this by Dave tomorrow and get responses back to everyone who has asked questions of us.

Thanks
AJG
