Steve,

One of the alignments currently under consideration for the bored tunnel passes under the NE corner of 1st and Stewart at the depth of approximately 210 feet from the top of the tunnel to the surface. Giving a % likelihood of this being the final alignment is not possible at this time – having worked on a multitude of possible alignments over the past 7.5 years for this project...

Gordon

Gordon

Any answer to my question from last week about the % likelihood we will go under the NE corner of 1st and Stewart with the bored tunnel ?

Steve
