**Follow Up Flag:** Follow up  
**Flag Status:** Red

Alec,

The meeting went well. Ed and company said they thought the "new perspective" would help us get to design approval more efficiently.

Ed asked that the three deviations prepared on April 10 be released to his team so they could use the information as background to better familiarize themselves with the project. It is understood that the new, from the ground up, corridor analysis would most likely trigger additional deviations in the future.

Meeting minutes to follow soon from Karen.

Bill Conner
