At least we didn't contradict each other. Should have checked to see if you replied before I hit send. Haven't seen the revised schedule yet, but Julie promised it will be ready. I assured her we can work out any issues with headquarters. I'll make sure in the morning. So far only 4 or 5 staff confirmed. If you are there with Julie, I may stay in Seattle and cover some things with John.

Hey - that's what I just said! Did we get new pontoon schedule for tomorrow and are you coming down or do you want me to cover with julie?

Mary, the existing bike routes will be maintained during construction of the south end and during construction of the bored tunnel. Bicyclists will have the same routes available when the project is complete. There will be improved bike / ped facilities throughout the corridor.

Subject: Bike access to West Seattle

A West Seattle member asks if people will be able to bike from West Seattle into Seattle, once the tunnel is done? Would current bike routes be maintained during construction?
