Ron - what are we sending her, and is it prepared now? Can I get a copy for my meeting tomorrow?

I received a request from Kathryn Leathers today, I was planning on giving her what she asked for on Monday. She was fine with the timeline.

John - Thanks! Also (not for tomorrow) it may be worthwhile to assemble this information for all 8 options (SR 99 only, seawall, utilities, city streets, transit) so we can respond to Representative Clibborn now...she's a little cranky with me so please see if we can send something we have, or can put together...thanks!

Subject: Bored Tunnel

Hey John - could you have someone get me a quick one-pager that shows the SR 99 component (including couplet) breakdown with loaded costs for the bored tunnel...something like:

- Seawall
- Utility Relocation
- Alaskan Way-Western Couplet
- Bored Tunnel (and length) for both twin bore and single bore as best we know them
- Other City Street Work
- Transit
- Other

Approximations are fine - I'll need for meeting with Gov tomorrow...thanks!
