FYI - I sent Lindblom the link to the presentations from the bored tunnel briefing, per his request.

Sure do - all the presentations from that briefing can be found here, under the heading "**Stakeholder Advisory Committee briefing - Dec. 16, 2008**":

<http://www.wsdot.wa.gov/Projects/Viaduct/library-meetingmaterials.htm>

Pages 6-10 of the "bored tunnel presentation" will answer some of your questions re: alignment and diameter.

I've got a black/white printout, but a color version would be easier to read, regarding the tunnel alignment compared to other tunnels the already exist.
