**Subject:** March 31

The MIC Executive Committee is taking up our stand on the viaduct at a special meeting Tuesday, March 31, sometime between 3:30 and 5:30. Warren Aakervik is on the Executive Committee and he and our chair, John Odland, are debating whether we should adopt a statement in favor of an elevated option if the deep bore is not feasible. In December, our EC voted unanimously for studying the deep bore option, but Warren was not able to attend that meeting.

It would be great if we could get an update from the team on March 31. We should schedule a presentation for 4, 4:30 or 5, followed by discussion.

I met this morning with the officers of Local 19 of the ILWU. I believe you see them this afternoon. They still like the elevated but Herald Ugles is bringing them around on the disruption issue and the advantages of the deep bore tunnel.
