Theresa,

Can you take the lead on this as to what documentation is available from the 405 Program, HQ Consultant Liaison, etc.? We need to quickly put together short policy document that captures what work would constitute preclusion from future contracts, as well as any related firewall requirements. I spoke to HDR this morning, told them we would set up a meeting once we had our policy established. We need to think about participation in advisory committees and project delivery related workshops as we craft this, so we can be fully transparent when we engage people to participate.

Thanks,

John

I agree with the approach. Let's cross-check with what we have been saying on I-405.

John - I agree and suggest we get Steve Reinmuth to help us work with Bryce to establish a rational and fair approach to be applied evenly - we basically told the primes they were conflicted out on the project they primed and that the minor subs were generally not conflicted out, and that we would take each major sub on a case by case

basis - need a good process - need Jerry and Marilyn Bowman in conversation too...thanks for flagging...

Subject: Re: HDR Questions on AWW Project Exclusion

Unless someone else has done something, I will call Ron K, since any discussion about being potentially precluded from work or related firewall issues needs to be coordinated with upper management.

We will need to be careful and consistent regarding our approach to this subject.

Ward, I was just contacted by on Ron Kinoshita of HDR [Ron.Kinoshita@hdrinc.com]. HDR is both a sub to HMM on their PMAC contract Y9762 and acquired Pharos, which is working for AWW for real estate support.

Ron wanted to know that if they HDR bids on the Bored Tunnel Project if it would this pose a COI for them? Or should I be asking the AWW project manager at this point?

Hi Tom,

Would you please e-mail what you find out.

Thanks,
Ron Kinoshita
