Attached is the latest approved Work Order Authorization (WOA) for XL3240. If you have questions regarding this WOA please let me know. Listed below is a description of the work contained in the WOA:

- This Work Order Authorization adjusts group category authorizations and reduces authorization to reflect the current project expenditure plan in conjunction with the Downtown Seattle Bored Tunnel design. All of the groups on this work order are closed until the project office determines what needs to be done in the second stage.

Thank you

Brian R Johnson
