Would there be a chance to see what this program can do before we make this decision?

The area wide MOT coordination is being managed by Brian Dobbins team perhaps this tool can be used to help his team as well.

This could easily be picked up again, at least to make sure we're coordinating N. Portal, S. Portal, H2K, and immediately adjacent projects such as Mercer, Spokane St Viaduct, 519..... My understanding though, was that either the City and/or Stan Suchan's group was going to be doing something similar to this that could be utilized for AWW. If those efforts aren't available for the AWW Project, then it may make sense to re-establish the Google Earth tool....

The reason we bought these four licenses was so that we could use the PB developed Google tool to show WSDOT managers construction impacts from multiple programs and projects (Seattle, WSDOT, ST, etc...) across the time continuum (4D). This was supposed to help us to manage the overlaps and suggest changes to schedules when we saw overlap in key locations. I am thinking it would be a very good time to get this going again. Mark and/or Chris, do you have any thoughts/suggestions on how or if we should proceed with this?

We do not use the software for Holgate to King projects. I haven't used the program on my PC and do not see a need to use it in the future.

It would be worth maintaining one license for Bored Tunnel Activites. We are not using this for the South end.

Good Afternoon Everyone,  
With the busy schedules we've had over the last year I wonder how much utility the Google Earth Pro software has been. Is there a consensus to remove it from the AWVSRP machines?

Hi Philip,

There are 4 licenses with Google Earth Pro that will be expiring on 3/18/2009. I better start the approval process now. Listed below are the PC Asset ID's linked to the software Asset ID A4849001.

MIS35897  
A1927037  
A1407099  
A4018011

(Alec Williamson, Paul Lacy, Ali Amiri, Philip Johnson-23rd Floor Laptop #2)

Please let me know if these subscriptions need to be renewed (\$400/user - total \$1,600). I would also like to ensure that the PC Asset #s and user names are correct. I will need to provide that information to Google.
