Alec, should we be stopping our review on the current submittal of the design parameters?

Hi Ed- I have asked our consultant to resubmit the geometric design criteria and design matrix deliverables after we have had a chance to review and agree on a basic approach for access control and the corridor analysis addendum. We welcome any feedback on the geometric design criteria early, but would like to extend the review duration on that deliverable to April 20th to allow all of us time to agree on the access control and corridor analysis documentation. Thanks for your understanding- I think this new approach will result in less review time and a smoother approval process overall. See you tomorrow.

Thanks,
Alec

Alec,

We will do our best to get comments to you by the 8th.

Thanks,

Edward Barry

Hi Mike- Would you be able to compromise a bit and get review comments in by April 8th? I would like to hold the comment resolution early the week of April 13, if possible.

Please let me know if this can be made to work.

Thanks,
Alec

Rudy,

We have not at HQ Design been able to do a complete review on this Civil Design Criteria Draft, we have started it, but pulled off due to the stimulus projects coming through for design completion. Also we have a change up in personal taking place in Design.

We are hoping to have the review complete by mid April if that works for you. John Klockenteger and Kurt Seilach from HQ along with Lee MacClellan from Region will be doing the review.

Let us know if that time is acceptable.

Hello,

Attached is the comment review form for the subject deliverable. Please use this form for your review.

The transmittal letter that was attached with this document stated comments were due on March 23, 2009 with a comment resolution meeting on March 25, 2009. Please disregard those dates. The due date for comments and the comment resolution meeting date is being being re-scheduled.

I will update you on the due date for comments next week.

Thanks,

Rudy Lemus
