Hi Joe,

We need to set up a schedule to give Susan and Alec weekly progress reports.

I also need to update our field work coordination meeting before your crew will be out and about.

Do you have suggestions?

Paul

Subject: Bored Tunnel Right of Way Plans

Joe,

I would like to get started on a record of survey and set of right of way plans for the segment under 1st Avenue from Columbia to Pine.

Jeff can assist with the research.

A task list is attached along with a PS8 schedule. Look at the schedule, and if you have recommended changes, let me know.

Have our centerline for this piece coincide with the existing 1st Avenue Centerline. For now we will assume a 54 foot tunnel with 15 feet on each side and 15 feet above and below. The right of way plans will need to show plan and profile, so leave room for the profile. Scale will be 1" = 50'.

Bill your time to: **XL 3238, Group 70, Work OP 0119, control section 179101**

We have our first meeting scheduled for the 13th, and we will have a drop in spot set up for Joe with a computer and phone so he has a place to stay when he works here.

This is going to be interesting, lets have some fun too.

Paul
