As you know, we will hold our spring viaduct inspection and closure on March 21 and 22. I wanted to check in to see if you are planning to have any "experts" up on the viaduct (besides the usual suspects). I wasn't sure if you would have bored tunnel folks out there checking out the lay of the land...or others providing technical tours. If you know of any other activities planned for the viaduct closure, please let me know as soon as possible.

Thanks,
KaDeena
