I'm at a different computer. Can you print this for me? Thanks.

Subject: Bored Tunnel and AWW Volume Comparison

Attached are the comparisons of the existing (2008) AMV and Alaskan Way volumes and those for the Bored Tunnel from the Year 2015 Scenario F model run. In the case of the tunnel Randy is still working on getting the volumes sorted out north of the Harrison Street portal so only the tunnel mainline is shown. Sorry this took so long to produce but as usual any time you pull numbers for the model runs we find other things that don't look just right and need to get "post processed".

Jim
