Subject: AWV Bored Tunnel Workshop Agenda
Follow Up Flag: Follow up
Flag Status: Red
Attachments: AWVRP_Construction_Strategies_Workshop_(Rev_13_Mar_4_09).doc

To all:

Please see the attached agenda for the AWV expert panel workshop to be held next week. Make note of which group you are in on the first page (group 1 or group 2), and compare to the individual agenda items that show when you should consider being in attendance. Space will be at a premium in the conference rooms, and we want to be sure to limit participation to those who really need to be there. If you feel you want to invite others, please contact me specifically to discuss.

If you are scheduled to be a presenter, somebody will contact you shortly to coordinate your presentations if we have not done so already.

Also, this agenda could change a bit as the workshop progresses, so stay posted for further adjustments as necessary. We will send out a formal meeting invitation very soon with directions, parking instruction, etc. Thanks in advance for your participation!

Matthew D. Preedy, P.E.

Deputy Program Director

WSDOT - Alaskan Way Viaduct & Seawall Replacement Program
