Thanks, John. Alita placed the documents on our FTP site -- I will ask her to send instructions to all on how to access the files.

Theresa and Matt - today I gave Alita a CD with the Miami, Lake Mead and Sound Transit (2000) tunnel design-build RFP documents. She will (has) ask you where in the WSDOT system the files should be placed for internal access.

I also have the ICE (UK) Target Cost conditions of contract which may be of use. See attached (I will send in 2 emails, the files are large)

John,

As you requested, below are the RFQ, Basis of Design Report, and Concept of Operations Report that were used in the Port of Miami Project that included twin 40' diameter bored tunnels with two-lanes in each bore. Even though the Port of Miami was done as a PPP, I think it provides a good overall road map for a D/B road tunnel as well. I have the rest of the RFP after you digest these. Eldon Abbott who was the PM for this project will be here next week to participate in the South Portal workshop. I will try to set up a meeting with key folks to discuss further. Please let me know if you have any questions.
