Subject: FW: Site Selection & Concept Report

Morning Alec,

I am trying to find out who the right contact person is in regard to the site selection and concept report for the bored tunnel on your end. I have been talking to Jim Rodgers and he is trying to find out how much time he needs to allot to the process over the next biennium. This process can take up to 6 months for the concept report and a year for the site selection report. Are these already being pursued on your end? If not whom do I need to contact to help facilitate this process. Are you able to answer this or refer me to who can? On the SR 520 project, they thought they had the site selected and found out later that they needed to complete this process for the new bridge facility and had to jump through hoops to get this done.

Thanks,

Mark C. Renshaw

Subject: Site Selection & Concept Report

6/19/2009

Mark,

Per our discussion. Attached are the Site Selection (5/7/09) & Concept Report () recently completed for 520 maintenance facility. As I mentioned, these were actually completed in reverse. Site Selection should be completed prior to the Concept Report. The completed Concept Report served the purpose of Due Diligence in the site selection process. Let me know what you find out from Alec.

I am trying to identify what my commitments to projects like 520 and Alaskan Way will be over the course of the next biennium and beyond. Look forward to hearing from you. Thanks
