I got an earlier email from Theresa Greco saying she wants to be the manager, I presume until a AWW environmental manager can be appointed. OK?

Hi Larry- In response to your voicemail, I agree that the new work order should be managed by environmental. The work order manager should be Allison Hanson until a new environmental manager is assigned.

Lee

We will continue utilizing XL3238 for general design activities for the Bored Tunnel.

We are setting up a new work order XL3460 that will be utilized strictly for EIS development activities related to the Bored Tunnel.

Hi Larry,

What is the XL number for the tunnel project?

Also, what are the WIN and PIN numbers for this project?

Thank you,
