Subject: FW: Viaduct - Bored Tunnel information

This is what I just sent over to Jamala. I'll let you know if I hear back from her about additional questions she'd like to ask.

Thanks for your help!
Kristy

Subject: Viaduct - Bored Tunnel information

Hi Jamala -

Thanks for your call today. Here's the information that we have on the Web site regarding the bored tunnel - I think some of this is what you may have already seen.

<http://www.wsdot.wa.gov/Projects/Viaduct/library-meetingmaterials.htm>
under the second heading, labeled "Stakeholder Advisory Committee briefing - Dec. 16, 2008."

Specific info about a bored tunnel in Seattle is in this presentation (I think this is the one you have):
http://www.wsdot.wa.gov/NR/rdonlyres/200E4491-47C7-4DBF-8810-CB78663CD062/0/AWV_SAC_BoredTunnelBriefing_121608.pdf

More general information about bored tunnels, the CEVP process, etc. can be found in the other presentations under that heading.

Unfortunately a number of staff are out of the office today. I'm trying to get in touch with Ron and see if we can get him on the phone with you. You said that you wanted to talk with someone about costs -- any other topics that you'd like to discuss? Just want to make sure I get the right people lined up if needed.

Thanks,
Kristy
