Pasco,

Once we have our basic implementation plan worked out, we want to come down and walk yourselves and all the discipline leads, along with Jerry, through the plan. We can possibly tag onto that the bored tunneling presentation by our international tunneling experts.

See this occurring by early Feb. if that can be arranged.

John

Sorry I am unable to attend due to the ongoing Region Administrators meeting occurring at the same time. If possible, this presentation would be greatly appreciated presented to folks in the HQ building in Olympia. Something to consider for those who won't be able to attend on the 20th.
