KaDeena,

Hey there, these look OK, as long as we ensure that they are messaged as draft and evolving with our ongoing design effort and integration of the bored tunnel design. It would be nice if we had one we could use for the Elliott/Western connection and crossing over the railroad, I know we have a few unresolved details up there, but I think that we could capture the current working concept at this point. I'll discuss with PB and Alec.

John
