We need to pull together some stuff for review with Dave around 1pm or 2pm. Need something that shows the full cost ranges we developed for the bored tunnel, and where the recent numbers fall within that range. Challenge will probably be keeping them apples to apples, since the ranges included other program costs.

We also need to develop summary sheets for all scenarios in the two-page format used at the SAC tunnel briefing, so we can then adjust mark-ups across the board if deemed appropriate. Not sure when we need these, but need to get moving on them.

John
