Ok, thanks for confirming. Also, I understand that you are leading the Delivery/Packaging teams, right? Will that include the RFQ development? Roland called me to find out what was going on with this, and I wasn't quite sure what to tell him. I am not working on scheduling any meetings for these topics at this time.

Alec,
You're the owner's lead for design issues and should be in this meeting. John was being a bit proactive about a couple bored tunnel categories. I believe we already are getting Rhodes included, but not sure about Hansen. Sally is sending you the invite.

Hi Matt-

I was setting up this meeting when I heard that John was setting up the same meeting. I would like to be invited, and I would also like Ed Hansen and Norman Rhodes from HMM invited as well, if possible. Please let me know. I am afraid that having only Gordon (PB) there to discuss ventilation approach will bias the discussion. I consider Fire and Life Safety to be under Bored Tunnel Design (me), but if there is another lead for that discipline, please let me know and I will step aside.

Alec
